

INFO 6250 SUMMER 2020 FINAL PROJECT:

Virtual Doctor Appointment Booking System:

- This Application is extremely helpful for present COVID Situation as we do not need to travel for appointment booking.
- We can look for recommended doctors and book our appointment 24/7.
- The application will be usable by multiple users simultaneously.

Technologies:

- This is a single page Appointment Booking System using create-react-app.
- The application uses a backend server that hosts the BUILT (using npm run build).
- The application will be usable by multiple users simultaneously.

LOGIN PAGE:

- The `login` button in the login page is disabled if there is no username entered.
- Once the user logs in, he/she will be taken to the home page
- It doesn't allow invalid username like 'DOG'.
